

CURRICULUM VITAE

Jigme Wangchuk
Senior Forestry Officer
Forest Resources Planning and Management Division
Department of Forests and Park Services
Ministry of Energy and Natural Resources, Royal Government of Bhutan
Thimphu, Bhutan

Contact: +975 77385897 / +975 17475115

Professional Summary

Forestry and Conservation professional specializing in biodiversity conservation, forest fire resilience, and ecosystem management in Bhutan. Proven expertise in policy implementation, inter-agency coordination, and applied research using GIS, remote sensing, and field-based monitoring. Committed to advancing sustainable forest management, protecting high conservation value areas, and empowering communities for long-term ecological stewardship.

Languages

- Dzongkha: Native, Fluent (speaking, reading, writing)
- English: Fluent (speaking, reading, writing)
- Hindi: Conversational
- Nepali: Conversational

Education

- Certificate in Foundation Inservice Training – Royal Institute of Management, Thimphu, Bhutan, 2020
- B.Sc. in Forestry – College of Natural Resources, Royal University of Bhutan, Lobesa, 2015 – 2019, *Thesis: Diversity and Distribution of Coccinellids under Different Habitats in Zhemgang Dzongkhag*
- BHSEC (Class XII) – Gongzim Ugyen Dorji Higher Secondary School, Bhutan, 2014
- BCSEA (Class X) – Wangchhu Middle Secondary School, Bhutan, 2012

5. Work Experiences

Senior Forestry Officer – Department of Forests and Park Services, Thimphu, Bhutan

January 2025 – Present

- Serve as the national focal for forest fire prevention and management, overseeing policy implementation and inter-agency coordination.
- Lead capacity-building initiatives to enhance forest fire resilience across landscapes.
- Provide technical support for forest pest and disease monitoring and management.
- Conduct spatial analysis and evidence-based assessments to inform national forestry planning.
- Head, Forest Resources Planning and Management Section / IKI Focal – Divisional Forest Office, Dagana, Bhutan (2025 – 2026)
 - Directed planning, monitoring, and management of forest resources in Dagana.
 - Coordinated research and field-based monitoring, including wildlife and fish diversity studies.
 - Managed high conservation value (HCV) areas and facilitated community forestry initiatives.
 - Contributed to management effectiveness tracking (METT+) and applied GIS/remote sensing for decision-making.

Forestry Officer – Department of Forests and Park Services, Dagana, Bhutan

January 2020 – December 2024

- Headed the Forest Resources Planning and Management Section, overseeing national and regional projects including IKI Living Landscape Project, UNEP SAFE Project, BTFEC Project, and APA initiatives.
- Served as Range Officer of Lhamoizingkha Range for six months, managing field operations and community engagement.
- Led Social Forestry and Extension Section activities, including community forestry program planning and capacity-building.
- Conducted field-based research and monitoring, including wildlife surveys, fish diversity assessments, and HCV area management.
- Applied GIS and remote sensing for spatial analysis to support evidence-based decision-making and conservation planning.

6. Research Experience

The Freshwater Fishes of Dagana – Dagana, Bhutan, 2025

- Methods: Fish sampling using the Biodiversity monitoring protocols (BMP) and GIS analysis.
- Key findings: Documented 47 freshwater fish species—the first comprehensive ichthyofauna survey for the Division.

- Contribution: Established baseline data for aquatic biodiversity monitoring and management.

Socio-economic Status and Climate Vulnerability of Divisional Forest Office, Dagana – Dagana, Bhutan, 2024

- Methods: Socio-economic surveys and climate vulnerability assessments using BMPs
- Key findings: Most households rely on agriculture and forestry, indicating high sensitivity to climate impacts. Tsendagang and Drujeygang identified as highly vulnerable; Lhamoizingkha and Dorona as low vulnerability. Human–wildlife conflict and exposure to extreme weather events were major challenges.
- Contribution: Provided evidence-based recommendations for adaptive capacity building, resource management, and community resilience initiatives.

Rapid Biodiversity Assessment Report – Dagana, Bhutan, 2023

- Methods: Sampling as per BMPs across 29 of 97 NFI plots.
- Key findings: Recorded 288 floral species (83 families), 40 mammal species, 647 individual birds (115 species, 37 families), 144 butterfly species, 15 amphibians, 27 reptiles, and 16 lady beetle species.
- Contribution: Provided critical baseline data to guide ecosystem management and conservation planning.

Biodiversity Monitoring (Insects) – Dagana, Bhutan, 2020–Present (Annual)

- Methods: Field surveys, insect trapping, and species identification across multiple habitats.
- Key findings: Documented diverse insect communities, including key indicator species such as lady beetles, supporting ecosystem health assessments.
- Contribution: Provided ongoing baseline data for insect biodiversity and informed conservation strategies.

Red Panda Survey – Dagana, Bhutan, 2020

- Methods: Field surveys, camera trapping, and habitat assessments.
- Key findings: Documented red panda presence and habitat preferences in targeted forest areas.
- Contribution: Informed local and national biodiversity conservation strategies and forest management decisions in high conservation value areas.

7. Publications / Reports

- Divisional Forest Office Management Plan for Divisional Forest Office, Dagana, 2026

- Conflicts to Co-existence (C2C) Strategy for Lhamoizingkha Gewog, 2026
- Conflicts to Co-existence (C2C) Strategy for Trashiding Gewog, 2026
- A Pictorial Guide to the Freshwater Fishes of Dagana – Divisional Forest Office, Dagana, 2025
- Carnivores Recorded in Sakteng Wildlife Sanctuary, Bhutan – *Journal of Animal Diversity*, 2025
- Diversity and Distribution of Ladybird Beetles (Coleoptera: Coccinellidae) under Different Habitats in Zhemgang, Bhutan – *Bhutan Journal of Natural Resources & Development*, 2024
- Socio-economic Status and Climate Vulnerability of Divisional Forest Office, Dagana, 2024
- Rapid Biodiversity Assessment Report for Dagana, 2023
- Carry out Forest Fire Fighting Training Manual for Gyalsung, 2023
- Developed Curriculum on Forest Firefighting for Gyalsung – 2022
- Six Species of Coccinellidae New to Bhutan (Insecta: Coleoptera) – *Oriental Insects*, 2021

8. Skills and Technical Expertise

Technical Skills

- Geospatial Analysis: Proficient in GIS (ArcGIS, QGIS) and remote sensing for spatial mapping, forest fire risk assessment, and biodiversity monitoring.
- Data Analysis: Skilled in statistical analysis using R and Excel, including ecological data interpretation and visualization.
- Field Survey & Monitoring: Extensive experience in field-based surveys for forest ecosystems, wildlife, freshwater fishes, insects, and high conservation value (HCV) areas.
- Forest Management & Firefighting: Knowledgeable in forest resource planning, fire prevention and suppression techniques, and forest pest/disease monitoring.
- Research & Reporting: Experienced in designing research protocols, data curation, and producing technical reports and management plans.
- Project & Financial Management: Competent in planning, budgeting, monitoring, and reporting for national and international conservation projects.
- Gender Mainstreaming: Experienced in integrating gender considerations into community forestry and conservation programs.

Soft Skills

- Communication: Effective in presenting technical information to stakeholders, communities, and government authorities.
- Teamwork & Collaboration: Experienced in coordinating multidisciplinary teams and inter-agency initiatives.

- Leadership & Capacity Building: Skilled in leading projects, policy implementation, and training programs at divisional and national levels.

9. Certifications & Training

- Remote Sensing of Wildfire Management – United Nations University Institute for Water, Environment and Health (UNU-INWEH), Dec 2025
- Introduction to Other Effective Area-based Conservation Measures (OECMs) – UNDP & WWF-US, Dec 2025
- The Science of Well-Being – Yale University, Feb 2025
- Andragogy (Training & Teaching) – Department of Forests and Park Services, Apr 2024
- Climate Change Vulnerability Assessment Training for the IKI Living Landscape – 20–25 Nov 2023
- Development of Curriculum on Forest Fire Management for Gyalsuung Cadets – Department of Forests and Park Services, Sep 2023
- Workshop on Reduced Impact Logging (Cable Crane Assisted Logging Operations) – 22–25 Sep 2025
- Hydrogeology and Springshed Management – Department of Forests and Park Services, Apr 2022
- Watershed Analysis using GIS – Udemy, Oct 2021
- Integrated Basic Arms and Drill Training – Military Training Center, Bhutan, Oct 2020
- Foundational Inservice Training for Technical Service – Royal Institute of Management, 2020

10. Projects

- Restoring Fire-Damaged Ecosystems and Enhancing Wildland-Urban Interface Resilience in Bhutan funded by AFoCO

11. Awards & Achievements

Scholarships

- Recipient of RGoB Scholarship for B.Sc. in Forestry (2015 – 2019) at College of Natural Resources, Bhutan

Academic Awards

- Recognized for outstanding research in “*Diversity and Distribution of Coccinellids under Different Habitats in Zhemgang Dzongkhag*” during B.Sc. Forestry program; secured second position overall in the B.Sc. programme.
- Recipient of His Majesty’s Certificate for topping the 1st year of B.Sc. Forestry program.

Professional Recognition

- Appointed as a Commissioned Officer by the Royal Civil Service Commission (RCSC) in 2020.
- Recognized as Outstanding Official for Three Consecutive Years (2023 – 2025) for exemplary performance and contributions in forestry and conservation.

12. Conferences & Workshops Attended

- Regional Model Forest Network at Paro, Bhutan, 2026
- Reduced Impact Logging (Cable Crane Assisted Logging Operations) in Germany, 2025
- Climate Change Vulnerability Assessment Training for the IKI Living Landscape in Nepal, 2023
